Introduction

PCC OER: A Digital Workbook for Beginning ESOL is digital content created for beginning and intermediate students learning English as a second language.

Video grammar lessons were gathered from popular YouTube teachers, and self-correcting exercises were created to extend learning. There are ten units grouped in three different levels:

- **Beginning**
- **High Beginning**
- **Intermediate**

Three original readers with self-correcting vocabulary and comprehension exercises accompany these materials:

- **Home and School – Beginning**
- **Portland People and Places – High Beginning**
- **Seven Wonders of Oregon – Intermediate**

All efforts have been made to make this book as accessible as possible to all learners.

Read more [here](#) about how and why this book was made.

This book originated in Portland Community College's PCC ESOL 23 curriculum, which is a language lab course for students in Levels 1, 2, and 3. These materials can be used by teachers or students as-is or edited.

Three readers accompany this materials:

- **Home and School** (Beginner) - This book contains 10 easy picture stories for beginning students of English. The stories have a Lexile level of 100L-500L and address common home and school situations. Each story includes images, self-correcting comprehension exercises, and a conversation prompt.

- **Portland People and Places** (High Beginner) – This book contains nine short stories about people and places of Portland, Oregon written for high beginner students of English (lexile range of 300-500). Each story has approximately 150-250 words. It is formatted as a picture book with approximately 1-3 sentences per illustration. Each story is accompanied by a set of self-correcting comprehension questions and a speaking prompt.

- **Seven Wonders of Oregon** (Intermediate) – This book contains nine short stories about natural wonders of Oregon written for high-beginner/low-intermediate students of English (lexile range of 500-600). Each story is approximately 225-250 words long and features a picture, a set of self-correcting comprehension questions, a writing prompt, and full citations of sources with links.

Overview for Teachers

Context

PCC OER: A Digital Workbook for Beginning ESOL was designed to be used in many different ways, including:

- as part of a self-directed course at a community college in North America
- during Computer Assisted Language Learning (CALL) computer lab sessions
- in small group or one on one tutoring
- to supplement grammar instruction in a class (as homework or in a flipped classroom model)
- to supplement reading in a class
- for self-study by independent learners

Why use A Digital Workbook for Beginning ESOL?

A Digital Workbook for Beginning ESOL was created by experienced teachers with a focus on what skills and information beginning and intermediate language learners benefit from. The lessons and exercises focus on a curriculum that should seem familiar to teachers working with immigrants, refugees, and international students living in an English speaking community.
open access

A Digital Workbook for Beginning ESOL is shared under a Creative Commons Attribution (BY 4.0) license, which means it is shared freely and openly. As long as the original work is attributed, A Digital Workbook for Beginning ESOL can be used in almost any way imaginable with no additional restrictions.

multimedia

A Digital Workbook for Beginning ESOL includes a mix of multimedia content in order to engage learners and provide multiple methods of instruction and practice. The instructional videos let learners see and hear teachers explain grammar points (also, most of the videos have closed captioning). The interactive exercises let students drag and drop, fill in the blank, answer multiple choice questions, and more. The readers combine text and interesting pictures to help learners develop reading skills as well. The content is also screen-reader accessible, which is crucial for those with limited vision or anyone who wants to hear a computerized speech version. Finally, the range of important topics in the videos and readers means that it is easy to create in-person speaking prompts and activities in a class or group setting.

multimodal

The workbook works well on laptops, desktops, tablets, and mobile phones. In our experience, many learners have embraced their phones for learning English. The site has been designed to work equally well no matter what size it is being viewed on. The videos and interactive exercises only require a modern, up-to-date internet browser and an internet connection.

reliable

This project was made possible by support from Open Oregon, which is also hosting
the site. The links to videos, interactive exercises, and readers will not be constantly updated or lost in a swarm of constantly updated content.

For more information, see the following pages:

- Our screencasts on how to make use of the digital workbook show how we have used these materials in our classes, and breaks down important pieces (such as using YouTube videos with beginning level students, or working with the H5P interactive content).
- The Frequently Asked Questions contains more information about getting started and how to make use of this resource.
- Outside tools and resources contains more information about sites and technology that we have used.
- Workbook formats explains a bit more about different ways to make use of this resource.

Frequently Asked Questions for Teachers

FAQs

1. Can I freely use these resources in my class or tutoring groups?
2. Can I print, adapt, and re-share these resources?
3. Can I make my own version of this site?
4. How do the interactive exercises work?
5. Can I save my students' answers to the exercises and view them with this site?
6. Where do the videos come from?

Can I freely use these resources in my class or tutoring groups?

Yes! These resources were collected and curated in order to become an Open Educational Resource (OER). This work is meant to be shared, used, adapted, and improved upon with as few limitations as possible. There are OER for many other academic areas as well. For more information about OER, see this introduction and frequently asked questions page from Open Oregon.

↑Return to FAQ list↑
Can I print, adapt, and re-share these resources?

Yes, if the work is given proper attribution. This work is licensed under a Creative Commons Attribution license (CC BY 4.0), which means that anyone who wants to use these resources may do so if they give credit to the original work.

The “original work” includes this site, the interactive H5p exercises, and other written content on this site (such as this FAQ).

Here is an example if you were to site this particular page of the work:

Frequently Asked Questions for Teachers by Eric Dodson, Davida Jordan, and Tim Krause is licensed under a Creative Commons Attribution 4.0 International License.

To learn more, we recommend this explanation of Creative Commons licensing and attribution.

↑Return to FAQ list↑

Can I make my own version of this site?

Anyone with access to the Pressbooks content management system can clone this site (as long as it contains an attribution to the original work).

Pressbooks is an open source content management system for creating books and online resources for learning. With a mild learning curve, it is possible to create multimedia texts that can also be shared as PDFs or exported in other e-reader formats. (Our team has really enjoyed the rich features in Pressbooks!)

For more information about using Pressbooks and getting access to it, their site has up-to-date information. Depending on your teaching
context, your institution (or supporting partners) may have access to their own Pressbooks system, as well.

For those who have access to their own Pressbooks network, they can clone (i.e., copy) this site, or any part that they choose (again, provided they attribute the work under the CC BY license).

↑Return to FAQ list↑

How do the interactive exercises work?

The interactive exercises were created by ESOL Instructor Tim Krause using a web technology known as H5P. You can get an overview of how we use them in our screencast video about H5P.

The exercises do not require any plug-ins or additional downloads. As of 2018, they only require an up to date browser. That means they can be accessed and used on laptops, desktop computers, smartphones, or tablets. Learners can answer questions and get automatic feedback on their work as many times as they would like.

The exercises are powered by H5P, an open source technology that has been adopted by tens of thousands of institutions that focus on learning. (Our team really likes H5P as well! The number of features and amount of support is continually increasing.)

The H5P exercises can be downloaded and used in sites that have H5P plugins, such as WordPress, Moodle, Drupal, or other learning management systems. If you have access to an H5P-compatible site, you should be able to upload exercises from PCC OER: A Digital Workbook for Beginning ESOL, which also means you can re-mix or adapt these exercises (with CC BY attribution).

The download button is in the lower-left corner of each H5P exercise.
For more information, [H5P.org is a good source of up-to-date information about how to start editing and uploading H5P content](#).

↑[Return to FAQ list](#)

---

**Can I save my students’ answers to the exercises and view them with this site?**

Unfortunately, the answers to the exercises cannot be emailed or downloaded and shared. That is, if once a learner navigates away from a page of exercises they have finished (or if they reload the page), their answers will be lost.

We explain this and more in our [screencast video about H5P](#).

In order to track student progress, we recommend asking learners to:
1. Show their screen to a teacher or tutor, who can check the work and give additional feedback. This works well in computer labs or one on one learning contexts.
2. Save and email a screenshot of their completed work.
3. Keep track of their progress with a written list of the pages that they have completed.

Where do the videos come from?

The videos that are curated here come from educational YouTube channels. The videos that have been embedded into PCC OER: A Digital Workbook for Beginning ESOL were not created by or for this project, and are not included in the Creative Commons license for this work.

That means users can watch, link, or embed the videos, but they may not download, adapt, or redistribute the videos under a new YouTube account.

The YouTube channels used for this project include:

- Jennifer ESL (Beginning Level)
- Shaw English Online (High-Beginning Level)
- SmrtEnglish (Intermediate Level)

We are thankful for the hard work of these content creators!

If you have instructional videos that would be helpful for a future version of this workbook (especially if you are willing to share your videos under a Creative Commons by Attribution License), please reach out to us via Open Oregon.

Outside Tools and Resources

We have found other online resources that are very helpful for beginning English levels. These may not be as flexible or open as the H5P exercises or readers, but they might be a good fit for many contexts.

Additional Resources List

1. Vocabulary Spelling City
2. Classkick
3. Padlet
4. Readworks
5. Additional Sites

Vocabulary Spelling City

PCC has provided students with access to premium accounts to use Vocabulary Spelling City, a third-party website that teaches vocabulary, spelling, and phonics through games and online activities. Instructors create a teacher account and then can copy existing themed word lists drawn from TeachABC English or generate their own word lists.

With a premium account, teachers can set up student accounts and give them individual usernames and passwords. Teachers can then issue assignments that specify word lists and activities. After students complete the assigned activities, they can continue to use the word lists in other games. These activities are flexible and can
contract or expand to fill the time available. Word lists can be shared with other teachers.

Without a premium account, teachers should be able to work with word lists and share them with students, but students will not have their own logins or the ability to track their progress.

↑Back to list of resources↑

ClassKick

ClassKick is a free third-party website that allows instructors to design activities similar to a collaborative whiteboard space with options for typing, drawing, audio recording and work with images. Instructors who are new to ClassKick can watch an introductory video here.

Students do not need to create accounts; instead, the teacher creates an account and then gives a direct link or class code to students in order to access individual assignments.

These ClassKick activities have been used along with the Digital Workbook materials in the past. As ClassKick continues to evolve, they may or may not continue to be accessible.

Padlet

Padlet is a free, interactive, multimedia sharing space that could be used for communal show-and-tell activities, etc. The teacher could pose a prompt, and students could reply with text, images, video, audio, links, etc. Students can then leave comments on each other’s posts or simply give a thumbs up or emoji. Padlets can be archived and revisited. Students do not need to create accounts.

We love using Padlets to get students sharing content with each other and commenting on each others’ posts. It can be a great way to document their learning and interests throughout the term.

Readworks

ReadWorks is a free third-party website that can be used for sourcing reading material. A curated reading list for Level 3 students features an informational text and a literary text for each module, frequently connected to the overall theme of the module. Each reading includes an image, the text, an audio file, selected vocabulary support, and a short set of comprehension questions. Students do not need to create individual accounts; they use a single classroom ID and password. Instructors or tutors can quickly grade responses that are not automatically scored and then give feedback.

Teachers follow the instructions on ReadWorks to set up a classroom and roster, and then they choose texts for assignments. Then instructors give students their classroom code and password to complete the assignments. They are organized by module. In our in-person class, each module aligned to one week of class. They were chosen to align (or at least complement) the grammar and
other activities from that week’s class. The types of texts include informative and literature genres.

Workbook formats

There are many ways to use PCC OER: A Digital Workbook for Beginning ESOL. Here are a few suggestions:

• using links / individual parts / videos

We have carefully vetted the links and videos that are included in this section. Use PCC OER: A Digital Workbook for Beginning ESOL if you need supplemental material for your classroom. For example, the

• using online

Clone or copy the material and use it as is in Pressbooks.

• export into PB / HTML / etc.
• export as ebook

Because the readers are formatted as Pressbooks, they can be exported as ebooks and read on a Kindle or other electronic tablet.

• print or export PDF

The readers can all be printed and read just like paper books. The H5P exercises are interactive and meant to be done online. They cannot be printed out, though a dedicated teacher could re-type the questions into a text document.

If you create new materials or otherwise add to the digital workbook, we’d love to see what you have done, and help re-share it with others. Please reach out via the Open Oregon contact form.
